ABSTRACT
WA-IV-089
Mt. Angelwood, Keewaydin
Cascade Vicinity
private

18th-19th Century

Keewaydin is primarily significant for its association with Dr. Walter Reed noted U.S. Army physician who is remembered for his research in bacteriology, particularly with regard to Yellow Fever. This property was owned by Dr. Reed and his family as a summer home from 1899 to 1921. The house is also important for its architecture as an example of a turn of the century summer house. The Highfield, Maryland-Blue Ridge Summit, Pennsylvania area was a popular summer resort during the turn of the century period. The Western Maryland Railroad made the region accessible from Baltimore and Washington and excursions to the mountains were a frequent summer pastime. Many seasonal homes were built on South Mountain at that time. Most are now year round residences.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This shingle sheathed frame house is located off Water Company Road, east of Cascade and Highfield and south of Blue Ridge Summit, Pennsylvania on the side of South Mountain, near its top, in Washington County, Maryland. It is situated on a terraced area of the mountain's side and faces north.

The building is a multi-gabled structure, two stories high with a one and a half story back section set perpendicaulr to the main building. The second story of this front portion overhangs the first level by several feet being constructed above an open porch supported by round pillars resting on stone piers. Shingled panels span the area between the piers.

The front or north elevation of the house has a very irregular appearance. Although the house is only three bays wide at the front elevation, its overhanging second story makes it appear much larger. From the front or north, variations such as a projecting gable, a jerkinhead and hip form the roof line beneath which are both enclosed and open porches. The back part of the house, only one and a half stories high, is also three bays wide and is off set against the front section so that the entire plan of the house is irregular. Where shingles do not cover the exterior surface of the building, German siding is used. Multi-paned windows light the dormers and main rooms. The roofs are sheathed with asbestos shingles.

Although the house would appear to have been built in sections most interior woodwork and trim is consistent throughout the structure. Most of the millwork is of a type associated with the turn of the century period. The interior of the front section of the house at the first story consists of one large parlor with a fireplace in the west wall and double run stair in the northeast corner. In a closet beneath the stair written in pencil on the back of a riser is the inscription, "Dr. Reed, Blue Ridge Summit." Behind in the back section there are two rooms, a kitchen and dining room. The dining room has a back stair with a lattice work balustrade.

The house appears to be in good condition and stands on a tract of land containing nine acres. From the rear entrance a terraced walkway leads beneath an arbor to outbuildings and yard area

Keewaydin is primarily significant for its association with Dr. Walter Reed noted U. S. Army physician who is remembered for his research in bacteriology, particularly with regard to Yellow Fever. This property was owned by Dr. Reed and his family as a summer home from 1899 to 1921. The house is also important for its architecture as an example of a turn of the century summer house. The Highfield, Maryland-Blue Ridge Summit, Pennsylvania area was a popular summer resort during the turn of the century period. The Western Maryland Railroad made the region accessible from Baltimore and Washington and excursions to the mountains were a frequent summer pastime. Many seasonal homes were built on South Mountain at that time. Most are now year round residences.

Dr. need purchased this property in two transactions, one in 1899 from Theodore S. Royer and one in 1901 from T. A. Wastler (111/228, 150/62). Further examination is necessary to determine how many periods of building are represented in the house, but the notation on the back of the stair step in the front section, inscribed "Dr. Walter Reed, Blue Ridge Summit," would suggest that at least a portion of the work was done during Reed's ownership. Dr. Reed died in 1902. The summer home remained in his family until 1921, being sold by his wife. Emily Lawrence Reed (161/42). The present owners of the house have some Reed family items including a photograph of the house labeled in Mrs. Reed's hand writing, "Walter Reed's summer home, 1902."

Dr. Walter Reed was born in 1851 in Virginia and at the age of 18 he received an M. D. degree from the University of Virginia. In 1873 he received another M. D. degree from Belvue Hospital Medical College in New York. Dr. Reed became assistant surgeon in the U. S. Army Medical Corps in 1875 and was associated with the medical corps for the rest of his life. He began research in bacteriology and pathology in 1890 when stationed in Baltimore which led to the study of the spread of various diseases such as Typhoid and Yellow Fever. Among the most noted of Dr. Reed's discoveries resulted in the control of Yellow Fever through experiments that proved that the disease was spread by a specie of mosquito. This work was under taken with soldiers in Cuba during the Spanish American War. Dr. Reed held the rank of Major, was a professor of bacteriology and pathology at the George Washington University and served as curator of the Army Medical Museum in Washington D. C. After his death on November 23, 1902, the U. S. Army Hospital in Washington D. C. was named in his honor.

Dr. William B. Bean University of Iowa Hospitals and Clinics Department of Internal Medicine Iowa City, Iowa 52242

Dear Doctor Bean.

I must apologize for the inordinate delay in replying to your letter.

I am afraid the trail of Mrs Reed's books is a dead end. The books were sold about February or March at one of the weekly auctions held at the local Volunteer Fire Company. The regular auctioneer is Edgar J. Stull who does have an exceptional memory for individual items, prices, and purchasers but in this case he can not recall who bought the merchandise.

Materials sold at these auctions are on consignment from various individuals in the community and may come from as amny as twenty different sources in a single weekly sale. Records are kept of the items sold and significant itemscan be identified from these records, but there is no catalog of items as might be prepared for a Parke-Burnett sale. The newspaper ads are of no help since several from that time period included the identical entry. "books." The Reed family ownership of the books wasnot noted until the time of the sale.

Purchasers us numbered cards for identification and the listings ofnames and addresses versus the numbers are not kept beyond the time allaccounts have been settled. The records would hardly help even if they were available since the clerks do not have time to write a fulldescription on the sale item register, and once again the identification of those lots would probably have been simply. "books."

There are anumber of antique dealers from witin a radius of about 90 miles who more or less routinely attend the auctions and do buy a significant number of book lots, but individual buyers also account for a goodly portion of the total.

As I recall there were two lots of Mrs Reed's books sold. One was the books in French - thirty of forty in number - and a similar quantity of miscellaneous books, mostly novels of the pre-World War I period. Neither carton brought spirited bidding but I do not remember anything of the purchasers.

I can understand that it must be frustrating to you to have such a lead develop only to slip beyond your grasp before anything can

be done. I will keep alert for any future "Reed" items that may appear at these Thursday evening auctions since I do attend quite regularly, and the sales are again in progress after a summer break.

If you should make your visit here during the winter months, be prepared for weather as chilling as that in Iowa City. Keewaydin was an Indian word for the North wind, and it blows across this mountaintop with a force and regularity that well justify the Reeds use of the name.

Sincerely.

K. D. O'Bryen

Colonel K.D. O'Bryen P.O. Box 577 Cascade, Maryland 21719

Dear Col. O'Bryen,

Your letter of the 10th. of July is before me together with the fascinating enclosures and the remarkable account of the house in times gone by. I suppose Walter Reed must have referred by name to "Keewaydin" in at least 20 letters he wrote to his wife, particularly from Havana during the yellow fever studies. There are one or two deeds planned in the general vicinity or at least comments about purchasing ground.

You fascinate me by describing a auction where some of the Reed books were sold. If you could give me any details of this particularly who the auctioneer was, who the owner was at that time and the purchaser, information you no doubt do not have, I should be greatly indebted to you. The only collection of Walter Reed things that I know were sold within the last 10 or 15 years was bought by a urologist named, Latimer, in New York City and I have looked over all of his material and gotten copies of a few things of interest.

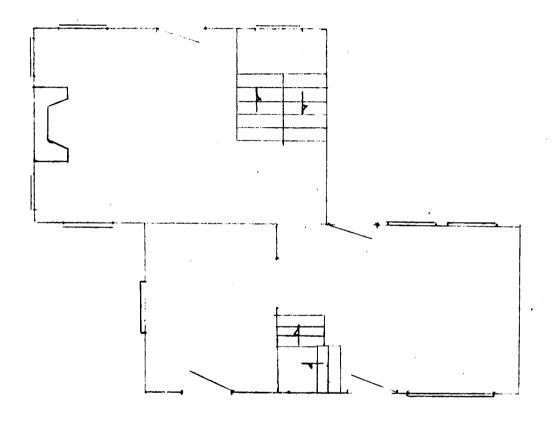

When I get back down to Galveston I will have my secretary make excerpts of comments about the property, the planning and so on. Is there now adjoining the place a reservoir which appears in some older maps? I will also look up photographs and send you copies. There is at least one of the house as it stood when Walter Reed had it. There is another of Walter Reed and about a 15 year old daughter hanging on his back. There is one of Mrs. Reed sitting on the porch in a rocking chair. I have a feeling I found one or two others somewhere, but I will either lend them to you or get copies made. I will also send you copies of a series of papers I have written on Walter Reed particularly in the past several years. I am enormously grateful to you and hope I have a chance to pay another visit to Blue Ridge Summit and have you conduct me around through the house and around the territory.

Y'r. Serv't.
